RINSE AFTER

EVERY USE

MAINTENANCE & WARRANTY

- The detector has a maintenance-free design. Replace only the search coil cover.
- Do not remove the rear cover. Dirt can collect on the O-ring and cause water ingress.
- Do not use or store the detector in high temperatures or direct sunlight.
- Water-resistance failure caused by incorrect storage or impact with a hard object is not covered by the warranty.

TRAVEL & LOSS PREVENTION

- The detector has a 1400 mAh lithium battery. You can carry it on an aircraft.
- The detector has positive buoyancy. Attach the safety lanyard during use to prevent loss.

BEFORE THE WATER

1 CHARGE BEFORE USE

Fully charge the detector before first use.
Align the magnetic USB charging cable with the charging contacts.
The detector gives a tone when you connect the charging cable.
The detector automatically stops charging when the battery is full.

1 ALIGN

2 CONNECT

2 ATTACH & PROTECT

The button has a sand-resistant design.
Complete both steps before you enter the water.

1 SECURE THE LANYARD

Attach the safety lanyard.
Turn the bolt to LOCK.

UNLOCK

LOCK

2 INSTALL THE SAND COVER

In sand or silt, install the
silicone sand cover.

SEARCH & CARE

3 POWER ON

Push the metal control button once
to start the detector. Push it once
again to stop the detector.
If you do not use the detector for
15 minutes, it enters lost alarm mode.
Push the button once or detect metal
to exit lost alarm mode.

4 SEARCH + PINPOINT

Move the front face of the search coil slowly above the bottom.
When the detector gives a target signal, turn the search coil
on its side to pinpoint the target.

SIDE PINPOINT

CRUISE SCANNING

5 RINSE + DRY

After every use, rinse thoroughly with fresh water.
Air-dry in a cool, shaded place before storage.
